LATINO PROJECT:

GALILEO INFORMATION CENTRE IN LATIN AMERICA

Managed by the LATINO Consortium

European GNSS Supervisory Authority

LATINO PROJECT OBJECTIFS:

December 2005: LATINO project has been chosen by GJU (now GSA) to lead the creation of **Galileo Information Centre in Latin America**

OBJECTIVES:

- Long term cooperation with all Latin America
- Consolidate the Galileo Community in the region
- Facilitate interaction between GNSS actors in LA and Europe
- Constitutes a focal point of awareness and promotion of Galileo services and applications
- Implement information and training activities related to the programme.

HOW?:

To be reactive to the wide needs of stakeholders from LA and Europe:

- Efficient dissemination of Galileo Activities and services through virtual platform
- Organization of meeting points for stakeholders : workshops, congress
- Ensure a complete educative background to provide high level skills
